

## **FURNISHES PATENT** MEDICINE TO WORLD

(Special to The Times-Dispatch.)
Washington, D. C., August 21.—
Nearly \$7,900,909 worth of "patent medicines" were exported from the United States in the past year, and for the past decade the aggregate amounts to more than \$50,000,000.
These figures, as compiled from the official records of the Bureau of Statistics, Department of Commerce and Labor, include only that class of exports designed as "medicines, patent and proprietary," of which the exports in 1911 were \$6,783,000 to foreign counties and more than \$250,000 worth to the non-continguous territotories of the United States, and do not include the numerous articles exported for use in the preparation of medicines, such as ginsing, which amounts to more than \$1,000,000 and mainly, roots, barks and herbs and other articles seems to have grown with their use. Fifteen years ago the value of the exports of "patent or proprietary medicines" amounted to less than \$2,000,000 per annum; in 1900 the total was but \$3,000,000, in 1905, \$5,000,000, and in 1911, practically \$7,000,000, the total for that year being larger than that of any other year.

All the world, it seems, takes Amer-

that of any other year.

All the world, it seems, takes American medicines, for the countries and colonies to which the \$7,000,000 worth of "medicines, patent and proprietary," were sent last year numbered eighty, scattered over every grand division and throughout the islands of the sea One would, perhaps, scarcely expect to see a large demand in Europe for this class of merchandise, yet the exports to England alone averaged \$2., 600,000 worth per annum during the past three years, while smaller values went to other European countries, many of them being communities in which the chemical industry has attained a high degree of development, such as Germany, France and Austria. tained a high degree of development, such as Germany, France and Austria. The larger exports of American medicines of the class under discussion in the fiscal year 1910 included England, over \$1,500,000; Germany, \$64,000; Spain, \$55,000; France, \$16,000, and Belglum, \$32,000. To North America the exports of American made patent and proprietary medicines average about \$1,500,000 per annum. Cuba, Canada Menico, Penama and the British West Indies being the best customers. To Cuba the exports last year

# TRUE REFORM

Leaders for a New Deal Win Compete Victory in

ENTIRE SLATE IS MADE UP

Program Prepared by Standpatters Meets With Repudiation.

Repudiation.

Following a stormy four-hour session of the board of directors of the Grand Fountain, United Order of True Reformers, beginning at 4 o'clock yesterday afternoon, and a caucus of the insurgents held at 1 o'clock this morning, a slate of the men who are to direct the affairs of the rehabilitated colored insurance order was drawn up, which practically excludes from the future management of the involved order every executive officer identified with the last administration. Sentiment seems overwhelmingly in favor of the insurgents, and no serious opposition is expected to their election at the first session of the order, which takes place this morning.

The New Officers.

The slate drawn up at the post-midnight session reads as follows. For Grand Master, to succeed A. W. Holmes—W. R. Griffin, of Washington, D. C.; for Grand Worthy Secretary, to succeed W. P. Burrell, three men are proposed—B. A. Cephas, of Richmond, B. A. Graves, of Richmond, and J. F. Douglass, of Roanoke. Dr. John Merriwether, of this city, will in all probability succeed himself as Grand. Worthy Treasurer, and J. Thomas Newsom—of Newport News, will by common consent be chosen as general attorney. The minor officers will all be chosen from the insurgents, insuring an entirely new regime in the future management of the order. The caucumaming these officers at an early hour this morning was presided over by Dr. J. E. Dellinger, of North Carolina. Three hundred and thirty-eight delegates from twenty-eight States were registered at headquarters at the True Reformers' Hall late last night. Delegates are here from as far South as Florida and as far West as Oklahoma. Two women are the delegates from Rhode Island, the northernmost. State represented. The convention is composed almost entirely of men who have attained success and distinction among their fellows, and among their numbers are found bankers, real estate dealers, capitalists, physicians and lawyers in large numbers. All have come to Richmond imbued with the one idea—to rehabilitat

Stand-Patters Routed.

amounted to \$424,000, those to Brazii, \$337,000, Venezuela, \$140,000, and those to Chile and Colombia each about \$121,000.

Of the Aslatic countries, the British East Indies are the only communities where patent medicines of American manufacture seem to have gained a foothold. To India the exports of the fiscal year 1910 amounted to \$159,000; to the Straits settlements, over \$10,000, and to other British East Indies, \$4,000; while to the Chinese empire the total was but \$30,000, and to such large communities as Persia. Asiatic Turkey and Siam the shipments are relatively small.

# Safe Milk for Hot Weather No Waste-No Germs

Here is a milk that is utterly sterile—amazingly rich. A milk you can serve in frozen desserts and have them free from germs

Madam, here are some facts which you ought to consider. Nothing else connected with food is half so important to you.

Here is a milk which remains in hot weather exactly the same as it came from our dairies. It is the finest milk produced in America-from Hoistein cows. It is produced under ideal conditions. It is utterly free from germs.

If you are not using it every day it is simply because you don't know it.

### It Isn't Peculiar

Van Camp's is simply rich Holstein milk with two-thirds the water evaporated. Nothing is added, as there is to condensed milk-no sugar, no starch, no preservative. Nothing but water is

Our dairies are located in seven states, each in a famous dairying section. They are conducted under rigid inspection.

Close to each dairy we have built an evaporating plant, and each one is sanitary-built without

The milk fresh from the cows is put into a copper vacuum. On account of

the vacuum, a moder-

ate heat evaporates

most of the water. The

purpose is to reduce the

shipping bulk.

### Fruit Ice Cream

Dilute two 18-oz. cans of Van Camp's Milk with a pint of water that has been bolled and cooled Dissolve in it half a pound of granulated sugar. Mash a quart of strawberries, roan betries, or any fruit desired; add half a pound of sugar and let stand one hour. Fut the cream in the freezer and fereze. When about frozen pour in the berry juice and beat well. Freeze hard. Write for our book of 17 recipes, including all sorts of ice cream.

Van Camp Packing Co. Indianapolis, Ind.

When you put back that water you have a milk exactly the same as it came from the cow, save for the sterilization.

### No Richer Milk

There is no richer milk in all the world than we produce in our model dairies. When Van Camp's Milk comes to you it is as thick as thick cream. So thick that you add one part water for coffee, cereals or ice cream. It is 28 per cent solids, 8 per cent butter fat.

h It is like the milks of Switzerland. For we brought to our dairies the ablest Dutch and Swiss experts. To bring this milk to you in its perfect condition we have spent \$100,000 in research and experiment.

The result is the finest milk produced in America—the equal of any produced in the world. Common milk cannot compare with it.

# Its Utter Sterility

Each can of this milk is pasteurized after being sealed. It is absolutely free from germs.

Milkman's milk, as you know, is always germladen. There are millions of germs in each spoonful. The things which you make with it, unless they are cooked, are always alive with germs.

Careful people are coming to sterilized milk. Think how much better milk dishes will taste to you when you know they are free from infecti

## Cooking With Cream

To cook with Van Camp's is like cooking with cream. It gives a richness and flavor such as milkman's milk never gives.

The reason is this: Milkman's milk separates. The butter fat rises and the solids fall. When that milk gets to the cooking it is rarely more than a

Van Camp's is the whole milk. It has all the butter fat, all the solids, which belong to the richest milk. You will be surprised when you fires discover how rich the whole milk is.

### Six Cents Per Quart

When Van Camp's is reduced to the usual milk's richness the cost will figure about six cents per quart. Besides that you save the waste. You open a can when you want it, and it keeps till you use it up. In the average family the use of Van Camp's cuts milk bills right in two.

"garbles in increased that the

The 16-oz. can—a full pint of Van Camp's—costs 10 cents. The 6-oz. can costs 5 cents. Even the poorest evaporated

milk doesn't cost any less Your grocer has Van Camp's Milk, shipped from our nearest dairy. Tell him to send you some.

# Van Camp's Milk

Evaporated—Sterilized—Unsweetened

bution. The board of directors, by a large majority, absolutely repudiated this program, and proceeded to draw up one of its own, which made ample provision for the interests of the anti-administration party. The programs submitted by the administration were ordered destroyed.

The construction of the control of the insurgents was the action of the board in overruing a motton made by one of the standpatters, to table as proposition looking to the disburse-ment of the Old Folks' Home fund of \$25,090. Sentiment is much in favor of turning over this fund to the charitable institution since it is felt that such a cause has a superior claim on the finances of the wreckes bank. The old administration sought to prevent the disbursement of this fund, but the opposition party carried the move with little trouble.

Session This Morning.

Bids for City Home Ambulance Opened by Committee on Poor.

ITALY'S MARITAL LAW

# CHECKS CLARA WARD

Made an Italian Subject by Her Last Union, She Can Take No More Husbands.

Bids from twelve companies for the new automobile ambulance were opened by the Committee on Relief of the Poor last night. The prices ranged from \$2.590 to \$4.550. The appropriation authorized is not more than \$4.500. The committee decided to hold a special meeting Monday night for the purpose of hearing representatives of the companies, after which a decision will be reached.

Contracts for supplies at the City Home were awarded as follows: Bacon, shoulders, lard, soap and butter, Armour & Company; flour, Duniop Mills; rice, Harvey Blair & Company; sugar, C. W. Antrim & Sons; coffee, canned tomatoes, salt herring, L. C. Jounger & Company; canned corn, Spence-Nunnamaker Company; shoes, W. R. Phillips & Company.

rice, Harvey Blair & Company; sugar, C. W. Antrim & Sons; coffee, canned tomatoes, salt herring, L. C. Younger & Company; canned corn, Spence-Nunnamaker Company; shoes, W. R. Phililips & Company.

The contract recently awarded to C. H. Epps for sawing 500 cords of wood was cancelled because of the fact that Mr. Epps was call man in the Fire Department. The contract was awarded to James N. King. The committee recommended to the Council the appropriation of \$500 for the extension of the City Home sewer.

James H. Pinner, the new member of the Common Council, was introduced and took his place on the committee, succeeding Councilman Wallace C. Saunders, who recently resigned.
